AI Visibility Snapshot

Prepared for: Skin Renew Clinic (Brentwood & Franklin / Cool Springs, TN) Date: June 16, 2026

1. What buyers see when they ask AI about you

I asked the major AI engines and search the questions a real customer in your area would ask:

- *Who is the best med spa in Brentwood, TN for Botox and filler?*
- *What is the best medical spa in Franklin, TN?*

Result: AI recommended **SkinSpirit**, **Skin Essentials**, **GLOW Medical Spa**, and **Bella Vi** across both cities. **Skin Renew was never named.** The core reason is hard to miss: **your website is currently offline.** Visiting skinrenewclinic.com returns a suspended-account page, so there is nothing for AI or a customer to read.

2. Your AI visibility scorecard

Check	Status
Website is live and reachable	Failing (domain shows a suspended page)
Structured data (tells AI what you are, where, your services)	Missing
AI crawler access (robots.txt, sitemap, llms.txt)	Missing (no valid files)
Readable page title and content	Missing (no real homepage)
One clear brand across Brentwood and Franklin	Missing (presence is blurred)

Overall AI Visibility Grade: F (18 / 100)

3. The three things hurting you most

- 1 Your website is offline.** skinrenewclinic.com currently returns a suspended-account page, so Google and AI have nothing to read and a customer who clicks lands on an error. This single issue makes you invisible everywhere. It is usually a lapsed-hosting fix, and it is urgent.
- 2 No structured data or crawl basics.** Even before the outage there was no schema, Open Graph, or sitemap telling AI what you are, where you are, or what you offer. Right now the page title, robots, sitemap, and llms files all return the error page.
- 3 Invisible in both cities while competitors own the answers.** SkinSpirit, Skin Essentials, GLOW, and Bella Vi are named for Brentwood and Franklin. Your two-location presence is also blurred, with one office described as serving Franklin rather than a distinct Franklin location.

4. What this means

Right now both AI search and live visitors hit a dead end, and every “best med spa near me” answer goes to a competitor. Step one is simply getting a clean, structured site back up so AI can read you again. This is very fixable, and a fresh, AI-optimized site would put you ahead of competitors who still have not done the structured-data work.
