AI Visibility Snapshot

Prepared for: Amálie Aesthetics and Wellness (Brentwood & Nashville, TN) Date: June 16, 2026

1. What buyers see when they ask AI about you

I asked the major AI engines and search the questions a real customer in your area would ask:

- *Who is the best med spa in Brentwood, TN for Botox and filler?*
- *Where is the best place for filler in Nashville, TN?*

Result: Good news first. You are one of the few med spas that already shows up. Amálie appeared in every search, and on one the AI even named **Kristin as a master injector**. The opportunity is position: you sit **mid-pack**, behind **SkinSpirit**, **Skin Essentials**, and **BARE** in Brentwood, and around **fifth** on Nashville filler searches behind **Toxxology** and **Smiley**. You have earned a seat at the table. You have not yet earned the top of the answer.

2. Your AI visibility scorecard

Check	Status
Structured data (tells AI what you are, where, your services)	Good (medical-clinic schema)
AI crawler access (robots.txt, sitemap, llms.txt)	Good (no llms.txt yet)
Page title and basic on-page SEO	Good (minor: og:image / og:url missing)
Readable content (not hidden behind JavaScript)	Good
Position when AI answers (lead vs mid-pack)	Mid-pack (behind SkinSpirit, Toxxology)

Overall AI Visibility Grade: C (78 / 100)

3. The three things between you and the top

- 1 You are mentioned, but never first.** AI ranks SkinSpirit, Toxxology, Smiley, and BARE ahead of or beside you. Moving from “mentioned” to “first named” is driven mostly by review recency and authoritative third-party citations, and that is where the bookings concentrate.
- 2 You are missing the finishing touches AI rewards.** There is no llms.txt giving AI a clean summary of your practice, and your Open Graph is missing its image and URL. These are quick wins that improve how AI assistants and social previews read and represent your brand.
- 3 Your authority signals are under-leveraged.** You have no FAQ, service, or named-provider schema, so Kristin's strong reputation is not fully structured for AI to lift into an answer, and your presence on review-rich directories is good but not yet dominant.

4. What this means

Amálie is the rare local med spa that already has an AI-readable site and is genuinely showing up in Brentwood and Nashville answers, including a name-drop of your lead injector. So this is not visibility from zero. It is climbing from the middle of the pack to the top of the answer by strengthening review recency, third-party citations, and a few easy schema and llms.txt additions, while your competitors have not all done this work.

The full picture, every question your buyers ask, exactly where you rank, who is ahead of you and why, and the step-by-step plan to reach the top, is in the complete AI Visibility Audit. Let's book 15 minutes to walk through it. [Calendar link]
