AI Visibility Snapshot

Prepared for: Timeless Beauty Aesthetics Med Spa (Franklin, TN) Date: June 16, 2026

1. What buyers see when they ask AI about you

I asked the major AI engines and search the questions a real customer in your area would ask:

- *Who is the best med spa in Franklin, TN for Botox and filler?*
- *What is the best medical spa in the Cool Springs / Franklin area?*

Result: AI named **GLOW Medical Spa**, **dermani MEDSPA**, **Bella Vi**, and **OVME**. **Timeless Beauty was not mentioned in either search.** You only surface on a direct name search, through Yelp, BBB, and Vagaro. With Michelle's 30 years and a 4.7-star reputation, the practice is strong. AI simply does not know it exists.

2. Your AI visibility scorecard

Check	Status
Structured data (tells AI what you are, where, your services and reviews)	Missing (no schema at all)
AI crawler access (robots.txt, sitemap, llms.txt)	Partial (no llms.txt)
Page title and basic on-page SEO	Weak (no city or services; no description)
Readable content (not hidden behind JavaScript)	Good
One clear, authoritative brand	Partial (split across site, booking, listings)

Overall AI Visibility Grade: D (48 / 100)

3. The three things hurting you most

- 1 No structured data, and no page description.** Your site has zero schema markup and no meta description, so AI cannot cleanly read who you are, your location and hours, your services, or your reviews. This is the single biggest reason competitors get named first, they spelled it out for the machines and you have not yet.
- 2 Weak on-page basics and a scattered brand.** Your page title is just "Timeless Beauty Med Spa" with no city or services, and the brand is split across the website, a Vagaro booking page, two separate Facebook pages, and directory listings that name you differently ("Med Spa" versus "Medical & Aesthetic Center"). AI sees a scattered entity instead of one clear authority.
- 3 You are absent from the AI answers and have no llms.txt.** You do not appear in any "best med spa in Franklin" AI result, only on branded searches, and there is no llms.txt giving AI a clean summary of your practice. Competitors like GLOW and dermani are claiming those answers.

4. What this means

Buyers in Franklin and Cool Springs are increasingly asking AI who to trust, and right now AI is handing them to GLOW, dermani, and Bella Vi while your 30-year reputation stays invisible. The good news: your site is well built underneath, every issue above is fixable, and most competitors have not fully fixed it either, so consolidating into one clear, structured presence would move you quickly.

The full picture, every question your buyers ask, how often you appear, exactly who is beating you and why, and the step-by-step fix plan, is in the complete AI Visibility Audit. Let's book 15 minutes to walk through it. [Calendar link]
